

THE CLIMATE
PROJECT FOUNDATION

GREEN CAMPUS PROGRAM

“Green Campus Program enables schools and colleges to conserve natural resources like water and biodiversity, optimize energy efficiency, manage waste and educate about climate change and sustainability while addressing well-being of the students as compared to conventional educational institutes.”

Green Campus Program (GCP) is a flagship program of the Climate Project Foundation. In our vision and mission of creating a sustainable tomorrow, GCP serves as an effective transformative catalyst. As the name suggests, it transforms the conventional campuses into green campuses. We believe that climate crisis needs a long-term and highly impactful solution, and there is no better tool to resolve it than education. By inculcating the values that make our future generations (bearers of the burdened Earth) more planet-sensible, we try to accelerate the learning dividends by setting examples right there in the campuses of their schools, colleges or universities.

14+ STATES | 100+ EDUCATIONAL INSTITUTES | 5500+ TEACHERS TRAINED

HOW GREEN CAMPUS PROGRAM WORKS

AWARENESS

This unique and copyrighted program amalgamates various learning methodologies with a Project-based and Cooperative Learning Approach.

After an educational institution registers, we start with a workshop for teachers to make them aware about climate change, provide them with teaching resources and offer them an online course. This boosts the teachers' confidence to take the issue of climate change to their classes and talk about the science, impacts, and solutions.

TEACHERS TRAINING WORKSHOP

It is a half-day workshop on climate change, based on Sustainable Development Goals (SDGs), and the six thematic areas of green campus.

ONLINE PROGRAMS

Teachers are provided with Online Teaching Resources like Posters, Infographics, Comics, Workbooks, and Booklets.

EDUCATIONAL RESOURCES

Teachers are offered a free Online Certification course on climate change to learn more about the issue and in-hand solutions.

ACTION

Through GCP, we enable schools and colleges to conserve natural resources like water and biodiversity; optimize energy efficiency; manage waste; and educate about climate change and sustainability, while addressing the well-being of the students as compared to conventional educational institutes.

Our 6 Key Thrust Areas are:

We invite educational institutions (schools/ colleges/ universities/ educational societies) to register for the Green Campus Program and work on the above-mentioned thrust areas, followed by constant guidance and support, and an audit.

ACCOLADES

Based on the initiatives undertaken by the registered educational institutions (to provide students with a healthy environment while gearing them up for a sustainable future), the evaluation is done for each institution. The certification recognizes the impacts of ideas and practices, followed by which, The Climate Project Foundation would recognize the campus as Green and award the institution with a certificate and trophy. Based on the results, a rating is provided for each Green Campus certified school.

PLATINUM

90-100%

GOLD

80-89%

SILVER

70-79%

BRONZE

60-69%

CERTIFIED

50-59%

AWARD CATEGORIES

We have signed an MoU with the Indian Green Building Council (IGBC) part of Confederation of Indian Industry(CII) to provide Green School certification. Any Green Campus certified institution may further opt for IGBC certification.

IMPACTS OF GCP

- Improved Well-being and Reduced Absenteeism
- Optimized Waste Management
- Sustainable School Community
- Enhanced Biodiversity Value
- Efficient Water Management
- Reduced Power bills
- Enhanced Air Quality

Exposure to Nature and Nature-based Learning

Community-based Engagement

Green Campus Recognition
